REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The combination of features in the independent claims was not found in the prior art. The prior art comprises the processing of conditional and unconditional branch instructions and converting a conditional branch to an unconditional branch for speeding up instruction processing and also the reconfiguration of an arithmetic unit. However the independent claims 1 and 4 comprise the following combination of features not found in the prior art (where the features are claimed as a method in claim 4 and as an apparatus in claim 1): dividing the arithmetic processing including conditional branches to a first processing of unconditional branches and a second processing with conditional branches, generating configuration information in accordance with the divided first processing of unconditional branches; a first arithmetic step (in claim 4)(or reconfigurable arithmetic means in claim 1) for reconfiguring based on the configuration information and executing the divided first processing of unconditional branches based on arithmetic data; and a second arithmetic step (in claim 4)(or an arithmetic means in claim 1) for performing divided second processing with conditional branches in accordance with a result of the processing, correcting an arithmetic result of the first processing step (in claim 4)(or reconfigurable arithmetic means in claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
